

EcoVision

by Ecolane

Optimize driver security and eliminate possible fraud through EcoVision's integrated live stream camera solution

Complete 360° View Solution

The use of cameras with integrated software is your best ally in addressing financial vulnerabilities. EcoVision's module takes safety to new heights when it comes to dispatching software by combining:

Quality hardware

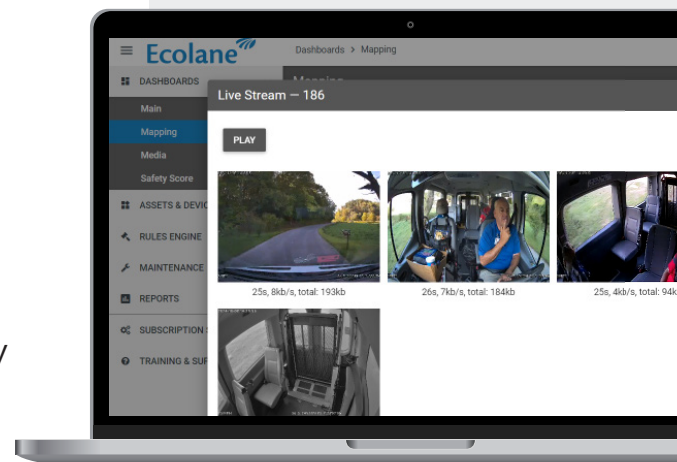

Advanced Data Monitoring Platform

EcoVision allows for Live Streams of all camera angles within Tripmaster without leaving the dispatch board!

When a panic button is pressed, you will be immediately alerted in-platform with a direct link to the video.

These solutions can have a significant impact on your insurance premiums by helping exonerate your fleet in accidents, fighting exaggerated or fraudulent claims, and identifying and addressing bad driver behavior.

EcoVision gives you real-time access with its complete solution.

Quality hardware matched with the most advanced data monitoring platform gives you:
